THE LEGENDARY BENDPAK 2-POST

TWO-POST LIFT GUIDE

**COMPARE
LEFT VS RIGHT!**

**Which 2-post
would YOU want?***

Answer: Left - BendPak; Right - Rotary

Lift Arm Top Plate Thickness

Carriage / Pin Hole

Let's consider things that may wear out or go wrong on a two-post lift and see what BendPak has done to minimize the risk.

Cable Sheaves and Cables

BendPak uses 5" sheaves while most other brands use 3". The larger the sheave, the less tight the cable bends, lessening cable wear and replacement. Also, BendPak uses 1/2" cable while many others use smaller 5/16" cable. Bigger cable, longer life.

Gussets

Let's face it, anybody can build a lift that goes up. The challenge is when you want to tackle a seized bolt and have to stick a pipe on the end of Johnson bar...last thing you need is for the vehicle to act like a pendulum - what we call the "wobble effect". Gussets are used to stop this. The diagram above shows the gussets used by BendPak and Rotary.

Carriage

Take a close look at our lift carriages (the lifting assembly that the arms are attached to) and then take a look at the competition. You'll notice our 53" tall carriages are considerably taller than most, which minimizes the stress placed on the load bearings and columns.

**We think you will agree
the BendPak Lift is the
BETTER CHOICE!**

**Comparison is for the BendPak XPR-10ACX vs the Rotary SPOA10.
Design features and specs are subject to change.
Please consult factories for updates.*

CHOOSE YOUR 2-POST LIFT

A WHAT CAPACITY DO YOU NEED?

Service cars & light trucks only?
10,000 lb capacity lift is a good choice

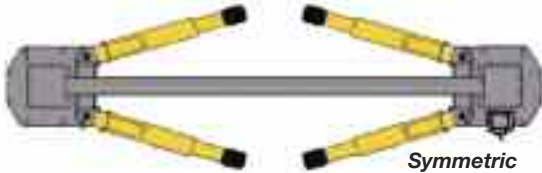

XPR-10 SERIES

Service heavy-duty trucks?
You need 12-18,000 lb. capacity lifts

XPR-12/15/18 SERIES

(see page 7)

B IS IT SYMMETRIC OR AN ASYMMETRIC BETTER FOR YOU?

Symmetric

Asymmetric

Symmetric vs Asymmetric

Two-post lifts are either considered symmetrical or asymmetrical. Symmetric automobile lifts are easy to identify because the posts face each other dead-on, and the support arm assemblies each hold approximately 50% of the load. Asymmetric lifts, on the other hand, feature arms that are shorter in the front, and true asymmetric lifts have a 30° rotated column design.

The benefit of these asymmetric differences is better clearance for vehicle doors, giving the operator direct access to the automobile interior even when the car or truck is raised. An asymmetric lift has a narrower drive through clearance, which may be a disadvantage if you work on wider vehicles, such as pick-ups.

If you mostly service cars or want easier access to the interior - Asymmetric is a good choice

XPR-10AS

If you service a lot of pick-up trucks
Symmetric is recommended

XPR-10S

C ARE LOW-PROFILE ARMS SOMETHING YOU NEED?

Do you service lowered sports cars & vehicles with ground effects?

LOW-PROFILE ARMS - LP

Standard Triple-Telescoping Arm

Note that the minimum pad height is actually higher on the Low-Profile Arms, but arm height is lower.

Do you have minimal lowered car work?
Choose the standard arms

XPR-10S or XPR-10AS

Optional Low-Profile Two-Stage Arm

D ARE COLUMN (HEIGHT) EXTENSIONS A GOOD OPTION FOR YOU? (see page 4)

Do you work on full size vans/sprinters and have required ceiling clearance?

EXTENDED HEIGHT - 168

If little service work on extended height vehicles
Choose standard columns

XPR-10 SERIES

TERMS & CONDITIONS

Contact your Babco Customer Service Representative or view complete terms & conditions online at babco.ca and babcoparts.ca.

All prices in this flyer are in Canadian dollars. We accept Visa, MasterCard and PayPal. Lease payments shown are estimates based on credit approval and a 48/52 month lease, with 10% purchase option at 48 months or fair market value at maturity. Remote locations may be subject to a freight surcharge. Equipment pricing includes delivery to many locations in Canada. However, some locations will be subject to a freight surcharge. Please contact us to get a Quote for delivery to your location. All sales are subject to GST/HST as applicable. British

Columbia residents are subject to PST. Residents in Saskatchewan, Manitoba and Quebec should self assess PST/QST.

In the event of any unforeseen conditions in producing this catalog or circumstances beyond our control, we must advise that all prices are subject to change without notice. Babco has made every attempt to illustrate and describe the products in our advertising accurately. However, these illustrations are for identification purposes only and products may vary due to manufacturers improvements or changes and may be subject to change due to any unforeseen circumstances. All products shown in this advertising are warranted by the manufacturer

against defects in materials and workmanship to the extent of the manufacturer's warranty. No other warranties are implied. For your own protection, inspect shipments before signing the freight bill. If a shipment is damaged, note damage on the freight bill and file a claim with the carrier immediately. Returned merchandise requires authorization. Contact our service representatives first for shipping instructions and to obtain a return authorization number. Credit will not be issued unless authorization to return merchandise has been received. Product must be returned freight prepaid to Babco. Any charges that may incur due to damaged merchandise will be deducted from credits owed. A 20% restocking fee will be charged for all returned merchandise.

FOUR-POST LIFT GUIDE

Dual-Hub Cable Sheaves

Dual-hub cable sheaves are used by the top brands. However, size matters. On their 14,000 lb models, BendPak uses huge 10-1/2" diameter cable sheaves (12" on heavyweights) within the runway and cross tubes, combined with massive 2-1/4" diameter sheave pin (4" on heavyweights). Compare this to other brands 9-1/4" - 9-1/2" diameter sheaves are pretty standard and the sheave pins tend to be much smaller than BendPak's. The extra diameter improves cable wear and critical component lifespan, meaning you'll spend less money in service related expenses down the road.

Heavy-Duty Aircraft Cable

BendPak's 14,000 lb capacity models have 1/2" diameter 6 x 25 stainless-steel lifting cables that have a breaking strength of over 14,000 pounds each. This aircraft-quality cable was specifically designed for lifting applications and provides a great balance between abrasion resistance and fatigue. Most top brands will have similar 1/2" cable.

Built-in Lubrication

On BendPak lifts, grease fittings are located on every sheave and sheave axle to help keep these critical parts well lubricated and to simplify periodic maintenance. Some ALI/ETL lift brands do not offer this feature, which can lead to excessive wear on the sheaves/pins and replacement cost. In these cases, greasing requires loosening/removing of cables and removing sheaves/pins.

Adjustable Ramp

Most brands runways are fixed in a single position. Some brands, including BendPak, have a runway that is adjustable which allows for handling vehicles with a greater range of axle width.

Lift Safety Standard

Most of our lifts are third party tested by ETL and certified by ALI to meet or exceed strict ANSI standards such as 1.5 times rated capacity load test, engagement lock test, cable cut and deformation tests. Be sure the lift you buy has the gold ALI/ETL label that assures your lift has been tested to meet these standards.

Warranty

So now you are aware of some of the design and quality differences to look for in choosing your lift. As a final consideration, let's look at the warranty coverage.

Component	BendPak	Rotary	Challenger	Forward
Structure	60 month	60 month*	24 month	60 month
Hydraulics	24 month	12 month**	24 month***	18 month
Power Unit	24 month	12 month**	24 month***	18 month
Wear & Tear	12 month**	12 month**	12 month	12 month
Shipping	12 month	12 month	12 month	18 month
Labor	12 month	12 month	12 month	6 month

* up to 30,000 lb capacity models only. Over 30,000 lb models have only 12 month warranty.

** increases to 24 months if installed by an Authorized Installer (excluding Rotary lifts over 30,000 lb capacity which are limited to 12 months)

*** certain models are limited to 12 months

Also, please be aware that all comparisons to other brands, and other representations such as warranties, etc. are accurate to the best of our ability but are subject to change. They are intended as a guide and please consult directly with manufacturer's websites for the most current information.

THE US EXCHANGE RATE CONSTANTLY AFFECTS OUR PRICING.

LEASE FOR **\$390** PER MO.

**TOP
SELLER**

ALIGNERS

Alignment systems have skyrocketed in price and left many workshop owners feeling left out in the process. Many small to medium sized shops would definitely benefit from owning a system and doing their own wheel alignments but simply have been left out of the process due to the costs of big name alignment systems.

The 8 Liner does the same job as the \$50,000 big name system. The 8 Liner is just as accurate and we are so confident in that we publish a statement of accuracy for every machine.

A Powerful Package:

- 8 CCD 360 degree measuring
- Non Runout clamps included
- Industrial quality PC with Windows Embedded
- Monitor, keyboard, and printer included
- Pair of RAV coated steel turnplates included
- Target data updated via internet
- VIN data base included
- VIN scan tool optional
- SmartPhone remote control app optional
- Lifetime Phone Support Included
- Lifetime Internet Based Support Included

**Free
Shipping**

RAV FASTLINER 8060
HEAVY DUTY TRUCK ALIGNER
BLUETOOTH SYSTEM

Use the Aligner to sell the alignment service by FastChecking the vehicles that enter your workshop. Use this same system to perform the alignment with the speed and accuracy required for success. Set up and measuring in 5 minutes REAL TIME. No rolling, pushing, or raising of the vehicle required.

The FastLiner includes more of our innovative features than any other single model:

- No rolling...No pushing and No raising the truck required
- No Runout FastClamps reference the wheel at the hub...not at the outer lip
- Nothing Faster- Ultra quick set up and measuring times
- Nothing more accurate- Outstanding repeatable accuracy assured
- Premium Software for Trucks, Trailers, Multi-Axles, Coaches, Light Trucks and more
- FastCheck Software Included
- Steer axle adjustment with only two heads is possible
- Bluetooth Sensor Heads
- Industrial quality PC with Windows Embedded
- Simple red-blue-yellow-green operating scheme
- SmartTablet included for outstanding remote operation
- Industry leading telephone based support line
- Industry leading internet based support
- 2 years parts warranty

Perfect Chemistry!

NitroPRO®

MAHLE NITROPRO® NTF-515B
NITROGEN TIRE INFLATION SYSTEM

\$7,434

LEASE FOR **\$208** PER MO.

NitroPro® NTF-515B offers your shop additional selling features of better fuel economy longer tire life, and increased safety to motorists.

Fast. Super-fast service times of seven minutes for six tires.

Easy. Automatic programmable operation with simultaneous fill for easy and fast operation.

Customizable. Dual settings for either 95% or 98% Nitrogen purity.

Breakthrough Technology. Removes fine particulates and residual moisture to improve tire life.

Technician-Friendly. Highly visible LCD and analog gauge for increased technician optimization.

Reliable. Maintenance-free membrane technology for less downtime.

Multi-Coolant Exchange that multiplies results!

MAHLE FLUIDPRO® MCX-2
MULTI-COOLANT EXCHANGER

\$3,330

LEASE FOR **\$93** PER MO.

FLUIDPRO® MCX-2 Coolant Fluid Exchange System provides the convenience of having one machine for multiple coolants, providing simple, rapid switching from one coolant type to another. The FLuidPro® MCX-2 provides versatility when switching from one coolant to another, allowing faster service times of three minutes. MCX-2HD provides the required features for heavy duty style servicing.

Versatile. Compatible with all coolant types for adaptability.

Effective. Contains two 7.5 gal new coolant tanks and one 15 gallon waste tank provides simple, rapid switching from one coolant to another.

Automatic Pump Shut-Off. Allows technicians to multi-task.

Drip-Proof Tank Connectors. Easy to disconnect and eliminate waste.

Fast. Service times of 3 minutes for increased productivity.

Visible Fluid Level Indicators. Aid in service accuracy.

Easy to Read Gauges. Monitor system pressure and vacuum for increased safety.

Convenient. Powered by vehicle's battery.

FluidPRO®

TRANSMISSION FLUID EXCHANGERS

Automatic made easy!

FluidPro® ATX Automatic Transmission Fluid Exchange Systems offers precise and accurate fluid measurement with minimal technician input to maximize efficiency. Designed for ease of operation, the ATX units provide fully automatic operation for automotive fluid exchange servicing.

Adaptable. 'Dipstick' or 'Cooler' mode selector, start engine indicator (ATX-3 only)

Electronic Diode Illuminated Keypad. Fluid flow direction indicator verifies correct hook-up.

Transmission Diagnostic Pressure Gauge. For a more effective exchange process.

New and Used Fluid Sight Glasses. Improve service accuracy.

Automatic Fluid Level Adjustment. +/- 1/2 quarts

Digital Weight Scale. Technology for accurate fluid exchange.

Patented Bypass Circuit. Increased safety for vehicle protection.

Fast. Full exchange service times of 2 to 5 minutes and 8 to 14 minutes in 'Dipstick' mode.

MAXLINE TUBING

MaxLine has all the great benefits of the Duratec product, but with reduced cost. MaxLine does not hold expensive agency rating for food, beverage and welding gases and is manufactured only for compressed air, saving you money.

- a blend of HDPE and aluminum multilayer tubing
- direct burial, on wall and in wall tubing applications
- maintains shape after bending by hand
- meets OSHA requirements
- tubing size - 3/4" ID / 175 psi working pressure

RECOMMENDED FOR:

- building layouts with many obstructions, corners etc.
- multiple air users / underground burial
- industrial plants, auto body and repair shops, farm, woodworking
- 3/4" size used for tubing lengths under 150 ft from compressor
- 3/4" size used for building less than 3600 sq ft (60' x 60')
